

PROPERLA®

WATER - REPELLENT

ProPERLA™ Water Repellent is a one-coat super-hydrophobic advanced clear coating for all mineral building surfaces, particularly absorbent roof tiles.

This water based water repellent coating is based on the latest nanotechnology. The special chemical composition reacts with mineral groups and actively bonds to mineral surfaces such as concrete and protect against rain, dirt, algae, pollution, oil and others.

Key Features:

- Super Hydrophobic,
- Breathable
- Self-Cleaning,
- Extends the life-span of all mineral building surfaces
- Prevents discoloration
- Prevents salt efflorescence
- Prevents growth of moss, algae and lichens

Recommended for: Mineral surfaces like concrete, clay, terracotta, paving slabs and slate etc.

Preparation: The surface needs to be dry, clean and free from contamination. Apply directly on surfaces less than one year old. Older surfaces must first be cleaned thoroughly with a pressure washer before treatment. Surfaces with strong discoloration, algae or moss growth (as well as heavily soiled surfaces) should be treated with ProPERLA CLEANER and finally rinsed with water before treatment.

Recommendation: Always make a test coat to ensure the compatibility of product and surface.

Application: Use low-pressure pump, sprayer, brush or roller. A minimum temperature of 5 °C is needed.

Coverage rate: 150-200 ml per m² depending on surface porosity

Equipment care: Cleaned up in water directly after use.

Storage: Store dry and frost-free. Keep out of reach of children. Shelf life 24 months (in original sealed container).

Packing sizes: Can 25 litres

Colour: Colourless when applied.

Thinning: Undiluted.

Drying time: Approx. 1 hour at 20° C and 60% RH.

Guarantee: 10 year manufacturers guarantee
