

Key Features

- Manufactured in Germany using the latest nano technology which reduces water absorption by up to 95%
- For use on mineral substrates such as concrete slabs, paving stones, terraces and many more
- Chemically bonds to the paving rather than creating a film on the surface that would breakdown over time
- Dries clear & does not alter the appearance of the paving
- Creates a self-cleaning surface
- Highly breathable
- Minimises stain adherence, preventing discolouration

Quality Standards

ProPERLA Paving Impregnator has been manufactured in accordance with DIN 4108 (European rating for water repellency) & tested in accordance with EN1504-2 : 2005, confirming depth of penetration, water absorption, resistance to alkali & drying rate.

**10 year manufacturers
guarantee**

PROPERLA® PAVING IMPREGNATOR
SUPER HYDROPHOBIC COATINGS

Keep paving dry & clean

Invisible waterproof protection for paving

Super Hydrophobic Self-Cleaning
10 Year Guarantee

Super Hydrophobic

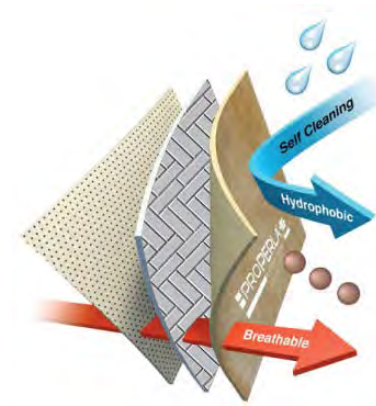

ProPERLA Paving Impregnator is an external super hydrophobic treatment which uses the latest nano technology to reduce moisture ingress on concrete slabs, paving stones & terraces up to 95%.

Once applied the treatment chemically reacts and actively bonds to the surface, causing the water to form beads that simply run off.

It does not alter the appearance of paving, it simply creates a water repellent surface that keeps the substrate dry & free from the moisture that can cause damage & discolouration.

Protection

ProPERLA Paving Impregnator provides a real alternative to the costly and wasteful decision to replace tired, stained paving stones. It protects the paving from the damage that rain and frost can cause, often leading to cracked paving.

Breathable

ProPERLA Paving Impregnator does not restrict the movement of water vapour, allowing moisture to naturally escape the surface. This ensures the long-term performance of the treatment, as without this high breathability, moisture would be trapped within the paving, causing the treatment to fail.

Self-cleaning

By creating a super hydrophobic surface on paving, ProPERLA Paving Impregnator has self-cleaning properties meaning any dirt can be easily cleaned away.

ProPERLA Paving Impregnator also:

- Deters the unsightly growth of moss, mildew and algae
- Prevents stains
- Protects against the damaging effects of rain and frost damage
- Improves the long term appearance of paving
