

Key Features

- For use on all vertical bare timber such as wooden fencing, log cabins, wooden gates, exterior wooden beams & wood fascia
- Dries clear & does not alter the appearance of the wood
- Extends the life span of the wood by keeping it dry
- Discourages organic growth such as moss, algae & lichens
- Prevents rotting & shrinkage
- Prevents discolouration from constant wetting
- UV resistant

Quality Standards

ProPERLA Wood Impregnator has been independently tested in accordance with the following Quality Standards:

- EAD 040287-00-04:2018 - 25 year performance
- DIN 4108 - European rating for water repellency
- EN 15824: 2009 - water absorption & water vapour permeability

**10 year manufacturers
guarantee**

SUPER HYDROPHOBIC COATINGS

WOOD IMPREGNATOR

Keep wood dry & clean

Invisible waterproof protection for wood

UNTREATED

TREATED

Super Hydrophobic Self-Cleaning

25 Year Proven Performance

Super Hydrophobic

ProPERLA Wood Impregnator creates a super hydrophobic surface which keeps the exterior wood dry.

Super hydrophobic surfaces repel water, causing it to form beads because the water is more attracted to itself than the treated surface. This means water will run off the surface making it extremely difficult to wet. This is known as the 'lotus effect' due to its similarity to the lotus leaf.

Wooden surfaces which have been treated with ProPERLA Wood Impregnator will respond in the same way, meaning water will form droplets & won't penetrate the timber.

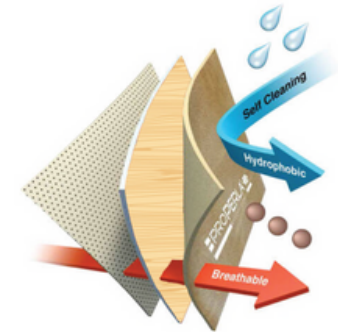

Protect

Water is a major cause of damage to wooden surfaces. This moisture will cause rot & a continual damaging cycle of swelling & contracting, eventually leading to wood cracking & warping. ProPERLA Wood Impregnator also:

- Discourages the growth of moss, algae & lichens
- Prevents rotting & discolouration

Breathable

ProPERLA Wood Impregnator does not restrict the ability for treated wood to breathe. This allows water vapour to escape the wood, preventing a build-up of moisture within the timber & helping to keep it dry.

Self-Cleaning

By repelling water, Wood Impregnator has self-cleaning properties, leaving wood clean & attractive as dirt is washed away with rainfall. This significantly reduces maintenance & ensures natural wood stays pristine.
